In this report we introduce additional context into the biggest stories dominating the year thus far and we can look no further than recent ransomware attacks. While the topic itself is not new, there is no question that the threat is now truly mainstream.

LETTER FROM OUR CHIEF SCIENTIST

What a 2021 we have had thus far. In this report we introduce additional context into the biggest stories dominating the year thus far and we can look no further than recent ransomware attacks. While the topic itself is not new, there is no question that the threat is now truly mainstream.

This Threats Report provides a deep dive into ransomware, in particular DarkSide, which has resulted in an agenda item in talks between U.S. President Biden and Russian President Putin. While we have no intention of detailing the political landscape, we certainly do have to acknowledge that this is a threat disrupting our critical services. Furthermore, adversaries are supported within an environment that make digital investigations challenging with legal barriers that make the gathering of digital evidence almost impossible from certain geographies.

That being said, we can assure the reader that all of the recent campaigns are incorporated into our products, and of course can be tracked within our [MVISION Insights](#) preview dashboard.

This dashboard shows that—beyond the headlines—many more countries have experienced such attacks. What it will not show is that victims are paying the ransoms, and criminals are introducing more Ransomware-as-a-Service (RaaS) schemes as a result. With the five-year anniversary of the launch of the [No More Ransom](#) initiative now upon us it's fair to say that we need more global initiatives to help combat this threat.

We hope you enjoy this Threats Report, please stay safe.

—Raj Samani
McAfee Fellow, Chief Scientist

RANSOMWARE: FROM BABUK TO DARKSIDE AND BEYOND

While the DarkSide Ransomware-as-a-Service (RaaS) attack on Colonial Pipeline held recent headlines hostage in Q2 2021, the ransomware activity story actually went deeper in the first quarter of the year.

Babuk, Conti, Ryuk, and REvil, preceded DarkSide in establishing 2021 ransomware trends.

We observed that “smaller” ransomware campaigns decreased in Q1 while the Ransomware-as-a-Service campaigns targeted and breached larger organizations and companies. The number of Q1 samples dropped as more attackers shifted from mass-spread campaigns, toward fewer, but more lucrative targets. Most of these larger, targeted victims received a custom created variant of the ransomware family at a low volume.

Here’s a breakdown of McAfee Labs Ransomware research and findings from Q1 of 2021:

Q1 2021 NEW RANSOMWARE CHART

Source: McAfee Labs, 2021.

FIGURE 1. WHILE UNIQUE RANSOMWARE DETECTED IN Q1 2021 DECREASED 50% COMPARED TO Q4 2020 DETECTIONS—IN PART FOLLOWING A DROP IN CRYPTODEFENSE—RANSOMWARE REMAINED A MOST SERIOUS THREAT AGAINST LARGER ORGANIZATIONS AND BUSINESSES IN Q1 AND Q2 2021.

MCAFFEE GLOBAL THREAT INTELLIGENCE

Based on activity from millions of sensors world-wide and an extensive research team, McAfee Labs publishes timely, relevant threat activity via McAfee Global Threat Intelligence (GTI). This always-on, cloud-based threat intelligence service enables accurate protection against known and fast-emerging threats by providing threat determination and contextual reputation metrics. McAfee GTI integrates directly with our security products, protecting against emerging threats to reduce operational efforts and time between detection and containment.

Here are notable statistics from Q1 2021.

FILE BY COUNTRY CHARTS

File Detection Rate % of Top 20 Countries (based on query volume) for Consumer and Enterprise

Source: McAfee Labs, 2021.

FIGURE 7. IN Q1 2021, THE UNITED STATES HAD THE HIGHEST QUERY VOLUME OF 775 BILLION QUERIES WITH A LOW DETECTION RATE OF 0.31%. OF THE 55 BILLION GTI QUERIES IN RUSSIA, MALWARE WAS DETECTED 13.38% OF THE TIME, RESULTING IN RUSSIAN CUSTOMERS EXPERIENCING THE HIGHEST DETECTION RATE OF MALWARE AMONG THE TOP 20 COUNTRIES. TURKEY HAD THE BIGGEST CHANGE FROM THE PREVIOUS QUARTER WITH A REDUCTION IN DETECTION RATE FROM 9.76% TO 4.8% AND A QUERY VOLUME OF 19 BILLION. JAPAN HAD THE LOWEST DETECTION RATE OF THE COUNTRIES IN THE TOP 20 WHICH WAS 0.14% AND A HIGH NUMBER OF QUERIES WITH 165 BILLION. CHINA HAD A DETECTION RATE OF 1.26% AND THE SECOND HIGHEST QUERY VOLUME OF 199 BILLION.

THREATS TO SECTORS AND VECTORS

The volume of malware threats observed by McAfee Labs averaged 688 threats per minute, an increase of 40 threats per minute (3%) in the first quarter of 2021.

Notable Sector increases and decreases from Q4 2020 to Q1 2021 include:

- Technology 54%
- Education 46%
- Finance/Insurance 41%
- Wholesale & Retail -76%
- Public Administration -39%

MALWARE THREATS STATISTICS

The first quarter of 2021 saw notable increases in several threat categories:

- Coin Miner malware increased 117% primarily due to growth in 64-bit coin miner applications
- Internet of Things (IoT) surged 55% due to Mirai
- Linux rose 38% along with the increase in Mirai

The first quarter of 2021 also was notable for decreases in several threat categories:

- New PowerShell was down 89% due to the drop in Donoff
- New Office malware decreased 87% also due to the drop in Donoff
- MacOS decreased 70% due to the drop in EvilQuest
- Ransomware fell 50% due to the drop in Cryptodefense

TABLE 1. NOTES FROM THE TOP MITRE ATT&CK TECHNIQUES APT/CRIME FROM Q1 2021: SPEAR PHISHING MOVED BACK INTO THE TOP 5-USED TECHNIQUES. IT WAS CLOSELY FOLLOWED BY EXPLOITING PUBLIC-FACING APPLICATION, WHICH REMAINED IN THE TOP 3 OF INITIAL ACCESS TECHNIQUES DUE TO THE RELEASE OF MAJOR MICROSOFT EXCHANGE VULNERABILITIES AND THOUSANDS OF AFFECTED ORGANIZATIONS WORLDWIDE. COMMAND LINE AND SCRIPTING INTERPRETER USAGE, SUCH AS WINDOWS COMMAND SHELL AND POWERSHELL, WERE THE MOST FREQUENTLY USED TECHNIQUES BY ADVERSARIES TO EXECUTE THEIR PAYLOADS. COMMAND LINE SCRIPTS ARE OFTEN INCORPORATED INTO PENTESTING FRAMEWORKS SUCH AS COBALTS STRIKE FOR ADDITIONAL EASE OF EXECUTION. AN ADVERSARY MAY RELY UPON SPECIFIC ACTIONS BY A USER TO GAIN EXECUTION OF A MALICIOUS BINARY. THIS TECHNIQUE IS OFTEN LINKED TO THE INITIAL ACCESS TECHNIQUE (SPEAR) PHISHING. PROCESS INJECTION REMAINS ONE OF THE TOP PRIVILEGE ESCALATION TECHNIQUES. COMMON OPEN SOURCE PENTEST TOOLS SUCH AS LAZANGE, GRABFF AND MOST RAT TOOLS HAVE AN ABILITY TO EXTRACT CREDENTIALS FROM WEB BROWSERS. THE USAGE OF LAZANGE AND GRABF HAVE BEEN OBSERVED IN VARIOUS RANSOMWARE ATTACKS IN Q1 2021. TOOLS SUCH AS MEGASYNC AND RCLONE ARE COMMONLY USED BY ADVERSARIES TO EXFILTRATE SENSITIVE DATA FROM A VICTIM'S NETWORK TO A CLOUD STORAGE. BOTH TOOLS WERE UTILIZED BY MULTIPLE RANSOMWARE GROUPS LIKE REVIL, CONTI AND DARKSIDE. DATA ENCRYPTED FOR IMPACT TECHNIQUE CAN ALMOST SOLELY BE ATTRIBUTED TO RANSOMWARE, ONE OF THE TOP CYBER THREATS OF Q1 2021.

ABOUT MCAFEE

McAfee is the device-to-cloud cybersecurity company. Inspired by the power of working together, McAfee creates business and consumer solutions that make our world a safer place. By building solutions that work with other companies' products, McAfee helps businesses orchestrate cyber environments that are truly integrated, where protection, detection and correction of threats happen simultaneously and collaboratively. By protecting consumers across all their devices, McAfee secures their digital lifestyle at home and away. By working with other security players, McAfee is leading the effort to unite against cybercriminals for the benefit of all.
